

E-CRANE GAZETTE

Special Edition — 80 Years Famaba

FROM GŁOGÓW TO THE WORLD: 80 YEARS OF E-TOWERS FAMABA

The 80th anniversary of E-Towers Famaba is a special anniversary not only for the company itself but also for Głogów. For decades, the plant's history has been intertwined with the history of our city, its economic, industrial, and social development. Successive generations of Głogów residents have gained experience here, developed their skills, and built the company's reputation, whose products now reach markets around the world.

For me, Famaba also has a personal dimension. It was here that I completed my first internship. I had the opportunity to explore the plant from the inside, witness the scale of production and the demands placed on employees, but above all, meet the people who made it so powerful. Therefore, I am deeply satisfied with how the company is evolving with the market, developing new competencies, and remaining an important part of Głogów's industrial identity.

During the anniversary gala, I congratulated the company on this exceptional event and, above all, on its wonderful team, who are the foundation for its continued growth. It is these people, their knowledge, experience, responsibility, and daily work, that have built Famaba's strength over the decades and allow it to take on new challenges today.

E-Towers Famaba combines the long tradition of Głogów's industry with modern production for wind energy, the port sector, and industrial infrastructure. This company is deeply rooted in Głogów, yet present in international markets and consistently looking to the future.

On the occasion of its 80th anniversary, I wish the entire E-Towers Famaba team continued growth, ambitious projects, safe work, and continued success. Głogów can be proud that a company with such history, expertise, and international significance is part of our city.

Rafael Rokaszewicz
Mayor of Głogów

THE OFFICIAL ANNIVERSARY GALA, 80 YEARS IN 3 ACTS: YESTERDAY, TODAY, AND TOMORROW

On May 29, 2026, the Andreas Gryphius Theatre in Głogów became the venue for the official celebration of the 80th anniversary of E-Towers Famaba.

The anniversary gala brought together employees and former employees, management, business partners, and representatives of authorities and institutions associated with the company.

The event's script was built around three words: **Yesterday, Today, and Tomorrow**. It was a symbolic journey through the company's history, its present day, and its plans for the coming years.

The first part was dedicated to history. A film retrospection based on historical photographs and recollections from retired employees recalled the decades of Famaba's development. The "Meritorious for E-Towers Famaba" ceremony honored individuals whose long-

standing work and commitment had a special significance for the company. This demonstrated that its 80-year history is primarily driven by people.

The "Today" segment presented contemporary E-Towers Famaba—its employees, projects, expertise, and environment. The "Friend of E-Towers Famaba" category recognized representatives of authorities, institutions, and organizations who have supported the company for years. A symbolic ribbon-cutting ceremony marked the opening of another chapter in its history.

The final segment, "Tomorrow," offered a glimpse into the future. The board and managers presented the company's development directions and ambitions, and a futuristic laser show highlighted the transition from tradition to modernity. The business partners with whom E-Towers Famaba is building its future were also honored.

The message was clear: the 80th anniversary is not the end of history. It is a point from which we can look back with pride and forward with ambition.

The entire event was accompanied by impressive artistic and multimedia entertainment – an acrobatic show on a ribbon, a light show, films, animations, and modern stage technology.

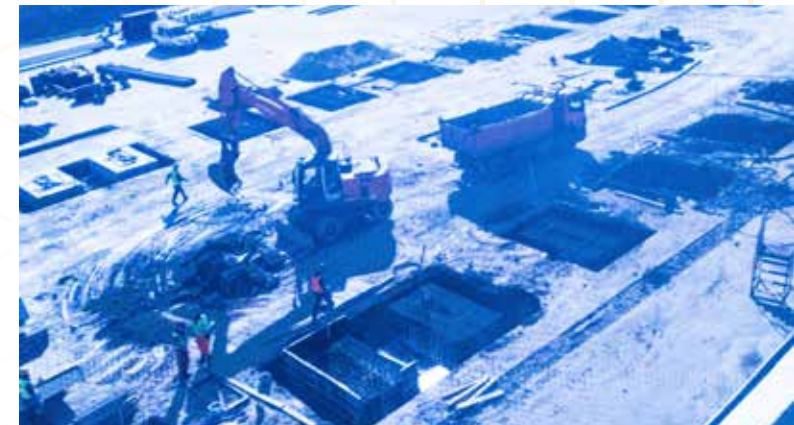

The gala at the theater was more than just an anniversary celebration. It demonstrated that 80 years of Famaba is about people, a shared history with Głogów, and a foundation for future decades of development.

Yesterday was the beginning. Today is the result of the work of many generations. Tomorrow is another chapter in the same story.

E-TOWERS FAMABA CELEBRATES WITH GŁOGÓW

The 80th anniversary celebrations of E-Towers Famaba couldn't have taken place without Głogów. The company's history, dating back to 1946, has been inextricably linked with the city and successive generations of its residents. Therefore, one of the most important elements of the anniversary year was E-Towers' presence at the Głogów Days.

The company became an official partner of the largest city event of the year, supporting the organization of the festival and sponsoring the Golec uOrkiestra concert.

At the same time, for three days, from Friday to Sunday, residents and employees were welcomed by a special E-Towers Zone, constructed from two striking spherical tents.

The first part of the space was dedicated to Famaba employees and their families. Guests could pick up an anniversary hat, test their knowledge of the company in competitions, and win surprise prizes. It was also an opportunity to show their loved ones a completely different side of the company.

The second part of the zone was open to all Głogów Days participants. One of the biggest attractions was a machine in which participants operated a crane arm with a gripper, attempting to place a colorful ball in the correct spot. Children were treated to a zone of giant blocks, from which they, along with animators, built towers and cranes.

Sketchbots, robotic arms that created portraits of participants on special E-Towers cards with a QR code leading to the recruitment website, also proved very popular. In the young LEGO engineers' zone, participants built windmill models that could be set in motion using mechanics and programming.

A chill-out zone with couches, loungers, cold drinks, and a large LED screen showing company videos, recruitment materials, and an anniversary retrospective of 80 years of operation complemented the experience.

For employees, it was a moment of pride. For residents, it was an opportunity to experience E-Towers Famaba from a new perspective.

After 80 years, Famaba is still part of Głogów. That's why it celebrated its anniversary with the entire city.

THE STORY OF FAMABA, 80 YEARS OF HISTORY WRITTEN IN THE PAGES OF A BOOK

Eighty years of E-Towers Famaba's operations have encompassed thousands of people, evolving technologies, successive generations of employees, and hundreds of events that have collectively shaped the company's history. To mark the anniversary, a new publication, "E-TOWERS FAMABA 1946-2026," was created, a continuation of the publication prepared ten years earlier for the company's 70th anniversary.

The book was developed by authors associated with documenting the history of Głogów and Famaba, and Vice President Joanna Czapla-Słowińska coordinated the project for the company. She collaborated with the authors, selected photographs, and reviewed and approved the materials. She also prepared texts on the company's present day and its current operations. Thanks to her dedication, historical knowledge was combined with the experience of those who know the company from the inside, as well as a perspective on its contemporary face.

However, the creation of the publication was the work of a much larger team. Materials were searched in archives, old photographs and documents were found, and current and former employees helped identify the people, places, and events immortalized in the photographs.

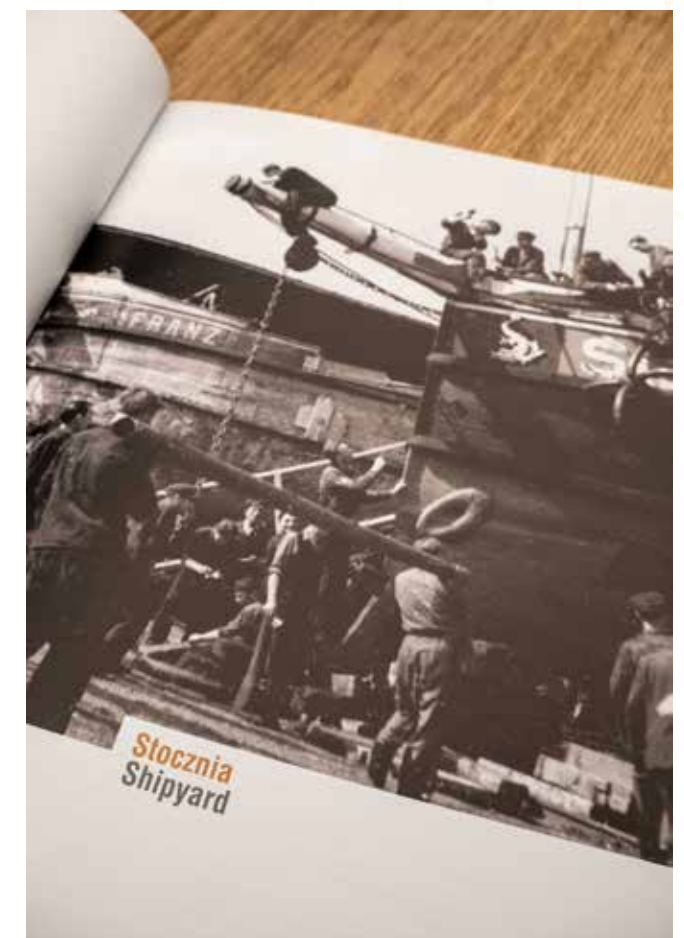

"This book is the result of the work of many people – the E-Towers team, those researching the archives, and current and former employees who shared their knowledge and memories. Thanks to this, we managed to create a coherent story about 80 years of Famaba," emphasizes Joanna Czapla-Słowińska, Vice President of E-Towers Famaba.

The publication shows not only the company's development but also its strong connection to Głogów. For eight decades, successive generations of the city's residents found work here, gained experience, and helped shape the region's industrial identity.

"E-TOWERS FAMABA 1946-2026" is therefore more than just an anniversary album. It is a record of the company, its employees, and the city with which it has remained inextricably linked for 80 years.

A NIGHT TO REMEMBER: FAMABA'S OSCAR NIGHT

On February 7, 2026, the Głogów sports hall was transformed beyond recognition. For one evening, the venue, which normally hosts sports games, was transformed into an elegant Hollywood-style ballroom. This is how we kicked off the 80th anniversary of E-Towers Famaba.

The event's theme was inspired by the Oscars. A red carpet, Hollywood set design, LED screens, a specially prepared stage, spectacular lighting, and a cinematic setting created the atmosphere of a grand premiere.

The evening opened with a dedicated intro, "Welcome to Hollywood," and one of the unique elements of the program was the Famaba anthem, specially prepared for the anniversary.

The most important official part of the ceremony was the presentation of awards to the distinguished employees. President Lieven Bauwens and Vice President Joanna Czapla-Słowińska presented the awards, emphasizing that people are the most important part of the company's 80-year history.

Throughout the evening, guests enjoyed numerous attractions. Among the attendees were impersonators of Marilyn Monroe, Sylvester Stallone, and Chuck Norris, who posed for photos and engaged guests in the fun. Marilyn Monroe also performed "Happy Birthday" during the cake presentation.

One of the highlights of the evening was a nearly hour-long performance by Cezary Pazura. The program also included dance performances, a violin, a DJ, a casino area, makeup, film competitions, popcorn, and an open bar.

GlamBot—a robotic arm with a camera that created dynamic, short films in the style of international red carpets—also generated considerable interest.

Hollywood Night was more than just a staff ball. It was a symbolic start to the anniversary year and a way to thank the people who had been a part of Famaba for eight decades.

For one night, Hollywood moved to Głogów, and E-Towers Famaba employees found themselves where they should have been during their company's 80th birthday - in the lead roles.

TOWERS & CRANE.

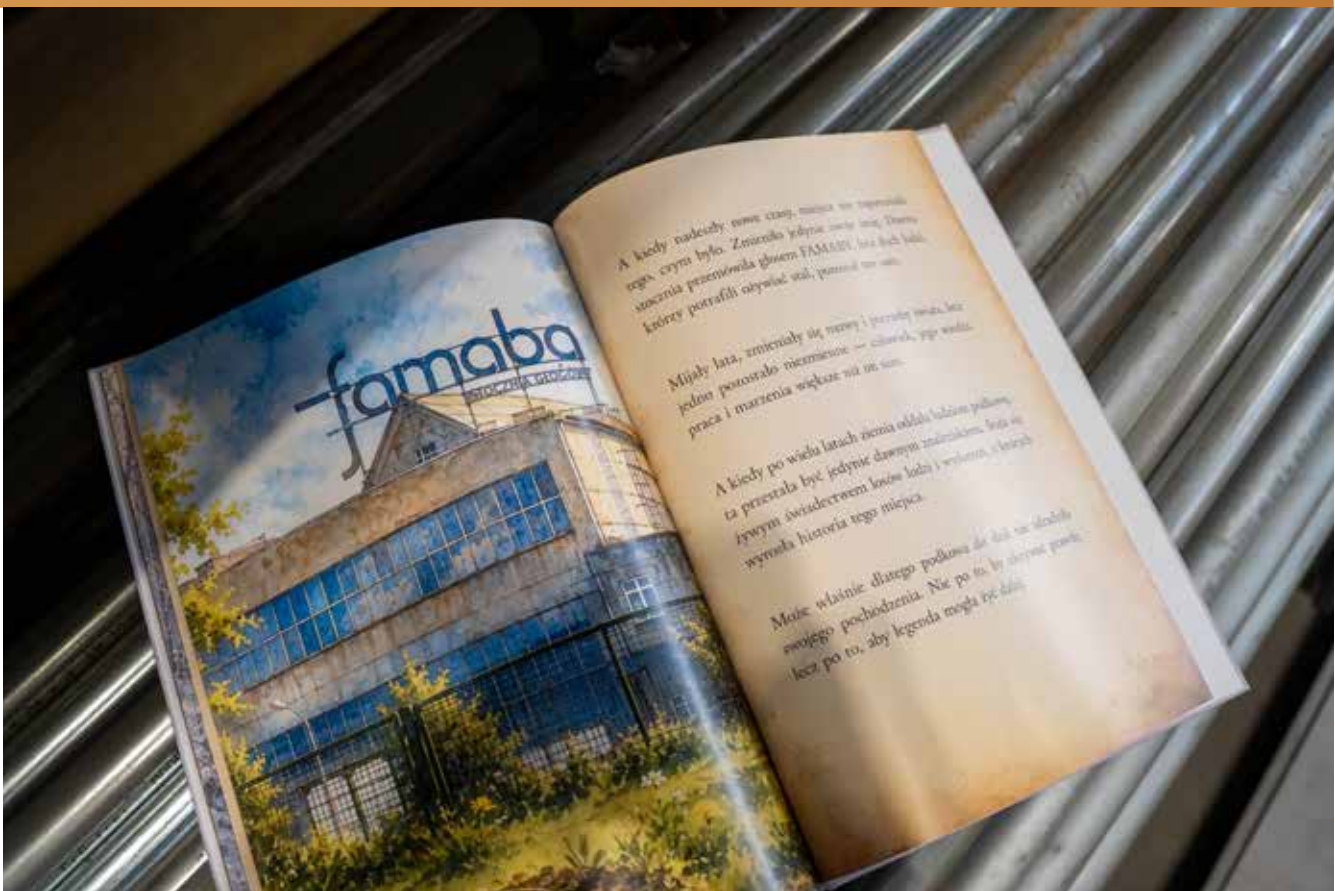

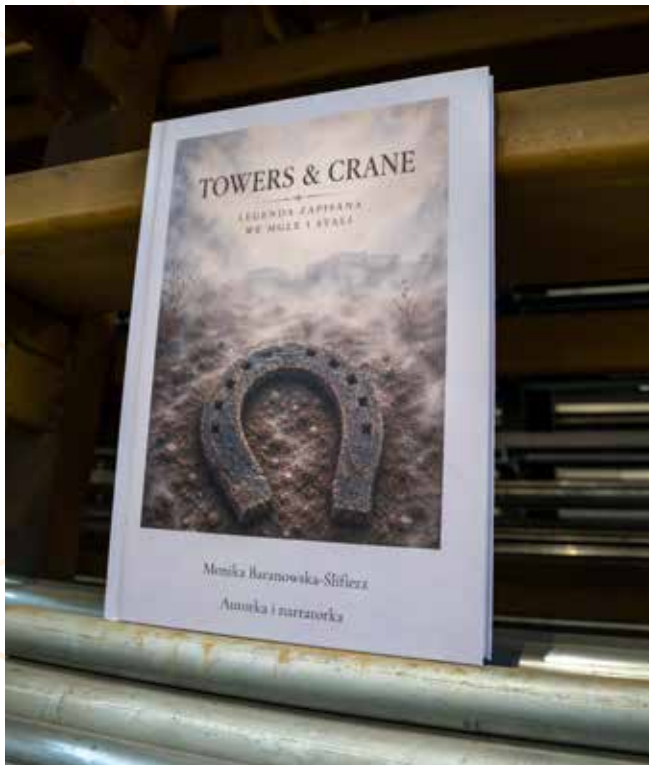

A LEGEND WRITTEN IN FOG AND STEEL

IT'S NOT THE STEEL ALONE THAT RISES TO THE SKIES,
NOR DOES A CRANE ON ITS OWN CONQUERS A FOREIGN LAND
AS IN EACH WORK THAT TIME DEFIES,
A HUMAN HAND AND DREAMS HIDE THEIR MARK

Written in the year of our Lord 2026
on the occasion of the 80th anniversary of E-TOWERS FAMABA S.A.

Monika Baranowska-Ślifierz
Author and narrator

To celebrate the 80th anniversary of E-Towers Famaba, a unique publication has been created by **Monika Baranowska-Ślifierz** - "TOWERS & CRANE. A Legend Written in Fog and Steel." This isn't just another company chronicle, but a literary tale of the place, its people, and the history imprinted in Famaba's memory.

The starting point is a horseshoe discovered on the plant grounds, which becomes a symbol of the continuity of the place and the mystery of its past. The author leads the reader from the days of the Głogów Fortress and the beginnings of the shipyard on the Oder River to modern-day Famaba, showing that despite changing eras, technologies, and products, the people, their knowledge, and their work remain unchanged. The whole is an original, emotional tribute to 80 years of Famaba, its people, and the place that has been linked to Głogów for generations.

One sentence best captures the essence of this story: "The horseshoe returned to remind us that steel has a soul."

*Monika Baranowska-Ślifierz
Author of the text and illustration concept for
"TOWERS & CRANE. A Legend Written in Fog and Steel"*

"I'm proud that I completed my internship at Famaba in Głogów. I got to know it from the inside, I met the people, and today I can say that it's one of the symbolic companies of our city."

Rafael Rokaszewicz
Mayor of Głogów

"Thank you for your commitment to preserving the memory and documenting the history of our local community."

Zbigniew Mazurek
president of the Głogów Region Society

A new edition of the book entitled "E – TOWERS FAMABA 1946 – 2026" was prepared under the editorship of TZG members Antoni Bok, Marian Kulczycki and Jan Manikowski

"Today's gala is not only an opportunity for us to reminisce and reflect. Above all, it's a moment of gratitude to the people who have built this company over the past eight decades."

Joanna Czapla-Słowińska
Vice President

"Knowledge is great, but practice is the basis."

Ryszard Ważny
Retired Famaba Technical Director

"A company's history is never just numbers. It's made up of people, their experiences, difficult moments, and the trials they endure despite adversity. Perhaps that's why this company is 80 years old today."

Barbara Król
HR manager

"The future of industry is not only about technological development, but also responsibility for people and the environment."

Marcin Tomasik
Quality Manager

80 YEARS TOGETHER BUILDING OUR LEGACY, SHAPING OUR FUTURE

To everyone who has been part of Famaba's remarkable journey, thank you.

Thank you for making our 80th Anniversary Celebration such a great success. Whether you helped organize the event, shared memories, contributed to the book, or joined us in celebrating this milestone, your support made it truly unforgettable.

Famaba's story has been written by passionate people. As we honor our past, we also look ahead with confidence.

Eighty years is not the end point. It's a testament to resilience, adaptability, and trust. Few companies reach this point, and even fewer remain innovative and active in international markets after all these years.

If the last 80 years were about building competence, resilience, and reputation, the coming years will be a period of transformation. Our role is not only to adapt to this future, but also to co-create it.

Therefore, we must: Invest in technology. Invest in people. Invest in quality and reliability. Because ultimately, the world will still need the same things it has always needed: well-made things and people who can create them.

**Thank you for being part of our history,
and an even bigger part of our future.**

Lieven Bauwens, ir.
CEO
E-Crane Group of Companies
